**建筑专业说明:**

- (1)除特别注明外，“H”为楼层的建筑面标高，“h”为楼层的结构标高，结构标高和建筑面标高同时标注时，标高后加（J）表示为建筑完成而标高，标高后加（G）表示为结构面标高。
- (2)除特别注明外，所有的内墙墙体为200mm。
- (3)除特别注明外，门均为2000mm，或位于所在房间（或走廊）的正中。
- (4)除特别注明外，各类管井、配电间、强电间、空调机房的建筑标高为+h=0.05，结构标高为h，弱电间、通讯间及其他机房、进线、门厅对应的完成楼面标高为当该楼层面建筑标高“h”，对应的结构标高为该楼层面建筑标高“h”。卫生间的完成面标高为-h=0.015，结构面标高详见平面图标注。
- (5)水管、水管口、排水穿孔孔的大小及具体位置以给排水专业图纸位置。
- (6)电线的强弱、强弱上接线并点，均按砌砖头大小设备以给排水专业图纸位置。
- (7)强电间、配电间、水管井、空调水管道、空调机房、避难楼梯的加压机房、设备间等墙面、顶棚及楼100℃C15混凝土板，门框外侧边与进房隔墙的边外线100℃C15，空房间、空房间内完成面完成高200mm。门设在门框外侧。
- (8)建筑物内除风管井外的水管井、管道每层在楼板处按结构图设隔档，待管道安装后用同样标号的混凝土封填，封堵后的封堵做法可参照国标GB50105《电线防火阻燃设计与施工》第16页的做法。
- (9)所有结构剖面墙体尺寸均以结构施工图为准，各设备专业预留洞口请同时同该设备专业图纸进行施工。
- (10)内墙及外墙窗体详见详平南标11ZJ111(⊗)，楼面平整变形缝详法译平南标图11ZJ111(⊗)，外墙变形缝详幕墙专业深化设计图；屋面变形缝详屋顶专业公司深化图。
- (11)首层人行出入口设置室外内外高差≤15cm，以斜面过渡；由入口处置水平≥3m雨水篦子的孔洞宽度不大于15mm
- (12)结构设计、各类管井及核心筒内的楼梯间等部位及室内其他区域需另详二次装修深化图。
- (13)地下室一层及首层室外地库、各层阳台或露台、屋顶等室外区域需另详景观专业深化图纸。
- (14)外墙幕墙、屋顶采光天窗需另详幕墙专业化图纸。建筑幕墙应在外层玻璃外沿采取符合国家相关规范规定的防火措施，幕墙与每层楼板、隔墙处的缝隙应采用防火封堵材料封堵。

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |              |               |               |                                                                                                                                                                                                                |  |    |           |               |               |       |  |  |  |    |     |         |         |    |     |      |         |         |      |         |     |      |         |     |      |         |     |      |         |     |      |         |     |      |         |     |      |         |     |      |         |     |      |         |        |      |         |           |      |         |     |      |         |     |      |         |     |      |         |     |      |         |         |      |         |            |      |         |         |      |         |     |      |         |     |      |         |     |      |         |     |      |         |        |      |         |           |      |         |     |      |         |     |      |         |     |      |         |     |      |         |     |      |         |     |      |         |     |      |         |     |      |         |     |      |         |     |      |         |     |      |         |     |      |         |        |      |         |           |      |         |     |      |        |     |
